# What's different in your product?

## Turn your smartness inside out

---

### Product Name

StackerSat

### Product description

StackerSat system is the solution ideal for high density storage and has been designed to be **integrated in a traditional stacker crane system** in order to introduce a technological innovation in terms of flexibility, performance and reliability based on the DataMatrix System (on request). Thanks to the DataMatrix technology, the warehouse is mapped in all its axis (X, Y, Z), allowing the absolute and continuous positioning of all its contents (machines and pallets).
