Turn your smartness inside out

Product Name

Novagas Gas Sensor

Product description

Novagas is an innovative **IR gas sensor** based on NDIR technique, suited to **measure the concentration of pollutant and toxic gases**, including CO₂, CO, CH₄ (also biogas), HC, SO₂, N₂O, NO, etc.

It is characterized by an embedded wireless transceiver, rugged gas cell for harsh environment, an embedded switch-mode battery charge controller for battery operation and photovoltaic, wind, piezoelectric energy harvesting, analog and digital I/O and fault diagnostic.
