# What's different in your product?

## Turn your smartness inside out

### Product Name

EVOLVO System

### Product description

An IoT device with active GPS + RF&BT modem is the core engine of our system. Coupled with EVO-plug® and T-charge, it becomes anti-theft and charging system. Paired with the app it can be used as a control system (vehicle parameters monitoring, locking/unlocking, tracking...). All together allows to manage fleet&rent.

It's suitable for all light electric vehicles: e-bikes, e-scooters or eKickScooters.

The complete system enables at the same time:

- Recharging with smart recognition system
- Safety & security
- Traceability/management
