What's different in your product?

Turn your smartness inside out

Product Name

ESMARTSHUTTLE

Product description

ESMARTSHUTTLE system is the patented solution ideal for **high density storage** particularly suitable for those warehouses to be built into pre-existing buildings.

Thanks to the system's flexibility, eventual constraints such as vertical limits, presence of pillars or irregular layouts, can be easily managed, as well as both the LIFO (Last In First Out) and FIFO (First In First Out) logics.

Thanks to the DataMatrix technology, the warehouse is mapped in all its axis (X, Y, Z), allowing the absolute and continuous positioning of all its contents (machines and pallets).
